MCT = Master Control Talkgroup

Upon activation of an "off" MCT talkgroup ID, that will remove the talkgroups assigned to the associated timeslot so an unwanted talkgroup does not takeover another talkgroup for timed period. After using the MCT, then PTT the talkgroup you want to use to re-activate it. Remember to re-activate the timeslot by using the "on" MCT talkgroup ID when you are finished if your QSO was less than 15 minutes. All MCT's TX on TS1, even if they control TS2. The MCT only controls the talkgroups on the timeslot, on the repeater you are using.

Talkgroups connected to Brandmeister are noted with a *

The radio talkgroup number is shown inside the (), in the talkgroup name.

Please be considerate when having extended conversations (10 minutes +) on wide area talkgroups. Please try to use a talkgroup with a smaller footprint. When making a call on North America, or a Statewide talkgroup, after making contact, please move to a TAC channel if possible, as not to tie up to 700+ repeaters. For instance, there are more than 50 repeaters that come up when there is a QSO on PA Statewide. To extend the life of the repeaters, and make them available for others to use, please use the minimum number of repeaters to maintain contact. TAC channels are designed to be a Point-to-Point talkgroup, minimizing the number of repeaters/resources being used.

This also applies to Hotspots. You will still be keying up all the repeaters that carry that talkgroup when using a hotspot. When talking hotspot to hotspot, repeaters do not need to be involved. Your QSO is being carried via the Brandmeister servers.
[See the D4D website for more detail - http://www.dmr4dummies.com/dmr-rag-chewing-and-hotspot-etiquette/](http://www.dmr4dummies.com/dmr-rag-chewing-and-hotspot-etiquette/)

For the repeaters that carry North America full time: The full time Regional and Statewide talkgroups on TS1 will suppress/hold-off North America when those talkgroups are active.

Please consider supporting your local DMR repeater, and/or your c-Bridge.

Like an analog repeater, a group or individual installed it, and maintains it. Sometimes this is overlooked. The repeaters and bridges make DMR the wide-area network it is today.

Please DO NOT repeatedly kerchunk a PTT talkgroup to monitor.

PTT talkgroups are for having QSOs, not for monitoring.

Doing so, prevents the use of the timeslot by others.

Repeater owners and users appreciate your courtesy.

Talkgroups need to be set as a Group Call. Private calls are not allowed.
