Please be considerate when having extended conversations (10 minutes +) on wide area talkgroups. Please try to use a talkgroup with a smaller footprint. When making a call on North America, or a Statewide talkgroup, after making contact, please move to a TAC channel if possible, as not to tie up to 700+ repeaters. For instance, there are more than 50 repeaters that come up when there is a QSO on PA Statewide. To extend the life of the repeaters, and make them available for others to use, please use the minimum number of repeaters to maintain contact. TAC channels are designed to be a Point-to-Point talkgroup, minimizing the number of repeaters/resources being used.

This also applies to Hotspots. You will still be keying up all the repeaters that carry that talkgroup when using a hotspot. When talking hotspot to hotspot, repeaters do not need to be involved. Your QSO is being carried via the Brandmeister servers. See the D4D website for more detail - <http://www.dmrfordummies.com/dmr-raq-chewing-and-hotspot-etiquette/>

The Interstate c-Bridge Talkgroups that are cross connected to Brandmeister Talkgroups are noted with a *
