MCT = Master Control Talkgroups

Upon activation of an "off" MCT talkgroup ID, that will remove the talkgroups assigned to the associated timeslot so an unwanted talkgroup does not takeover another talkgroup for timed period. After using the MCT, then PTT the talkgroup you want to use to re-activate it. Remember to re-activate the timeslot by using the "on" MCT talkgroup ID when you are finished if your QSO was less than 15 minutes. All MCT's TX on TS1, even if they control TS2. The MCT only controls the talkgroups on the timeslot, on the repeater you are using.

Hold-off Timers

Hold-off Timers can suppress FT talkgroups automatically when a particular talkgroup is active. The talkgroups that have this feature may be noted in RED for the PTT timer. The Hold-off timers are generally set to 6 minutes. After the timer expires due to lack of local activity, the FT talkgroup(s) assigned to that timeslot will automatically be enabled at that time.

Talkgroups connected to Brandmeister are noted with a *
