Please be considerate when having extended conversations (10 minutes +) on wide area talkgroups. Use a talkgroup with a smaller footprint. When making a call on North America, or a Statewide talkgroup, after making contact, please move to a TAC channel if possible, as not to tie up to 700+ repeaters. For instance, there are more than 50 repeaters that come up when there is a QSO on PA Statewide. To extend the life of the repeaters, and make them available for others to use, please use the minimum number of repeaters to maintain contact. TAC channels are designed to be a Point-to-Point talkgroup, minimizing the number of repeaters/resources being used.

**This also applies to Hotspots. You will still be keying up all the repeaters that carry that talkgroup when using a hotspot. When talking hotspot to hotspot, repeaters do not need to be involved. Your QSO is being carried via the Brandmeister servers. See the D4D website for more detail - <http://www.dmrfordummies.com/dmr-rag-chewing-and-hotspot-etiquette/>**

**The Interstate-2 c-Bridge Talkgroups that are cross connected to Brandmeister Talkgroups are noted with a \***

For the repeaters that have North America full time: The Regional and Statewide alkgroups on TS1 will supress/hold-off North America when those talkgroups are active

Please consider supporting your local DMR repeater, and/or your c-Bridge. Like an analog repeater, a group or individual installed it, and maintains it. Sometime this is overlooked. The repeaters and bridges make DMR the network it is today.

The repeaters noted with # are in transition between networks, so their talkgroups will not match the current Interstate c-Bridge layout.

Please DO NOT repeatedly kerchunk a PTT talkgroup to monitor.

TT talkgroups are for having QSOs, not for monitoring. Doing so, prevents the use of the timeslot by others. Repeater owners and users appreciate your courtesy.

Channels need to be set as a Group Call, no Private calls are
